CHROMALLOY BEGINS OFFERING CF6-50 AIRCRAFT ENGINE TEARDOWN TO PARTS SUPPLIERS

Two Commercial 747 Engines Now In-House at San Diego Service Center

PALM BEACH GARDENS, FLORIDA, July 24, 2012 – Chromalloy announced today that its San Diego, Calif., engine maintenance, repair and overhaul center now performs CF6-50 power system teardown services for MRO parts suppliers.

“We have established a launch customer for our teardown service and will provide it to parts suppliers worldwide, as well as our existing customers,” said Martin George, General Manager. “Chromalloy’s San Diego operation is one of the only service providers that can provide tear-down and manage the piece-part inspection and repair – all under one roof.”

Teardown on two 747 commercial airliner engines for a global parts supplier is now under way at the San Diego center.

The CF6-50 is the first engine for teardown service offered by Chromalloy; others will be added in 2012 and 2013.

The company’s 110,000 square foot maintenance, repair and overhaul center – the only MRO in Chromalloy’s global network of component repair stations – provides a range of other services including module refurbishment, equipment exchange, seals, Non Destructive Testing, engine monitoring and test cell analysis.

“San Diego is the only location within the company’s global network to offer tear-down and full MRO services,” George said.

In 2011 the San Diego repair center was modernized and additional equipment and tooling added.

Chromalloy is a leading independent supplier of technologically advanced repairs, coatings, and FAA-approved alternative parts for turbine airfoils and other critical engine components for commercial airlines, the military and industrial turbine engine applications.

Chromalloy facilities include operations, annexes and sales offices in 17 countries. More information is at www.chromalloy.com.

###

Chromalloy has evolved from a gas turbine parts repair business into the leading independent supplier of advanced repairs, FAA-approved replacement parts and maintenance, repair and overhaul for gas turbines used in aviation and land-based applications. Chromalloy serves the airline, military, marine and industrial gas turbine segments with a broad range of services at locations in 17 countries around the globe. Chromalloy is authorized by the FAA and EASA and many other NAAs, and is qualified under ISO and NADCAP. Chromalloy is a subsidiary of Sequa Corporation.

Sequa Corporation is a diversified industrial company with operations in the aerospace, metal coatings and automotive industries. Sequa is a Carlyle Group company. For additional information, visit www.sequa.com.
